## Plow Enhancements Make THE BOSS Standard-Duty Plows Anything But Ordinary

Pushing the snowplow industry forward, THE BOSS Snowplow is making two of its most popular “optional” features standard on its Standard-Duty Straight-Blade snowplows. A classic workhorse in THE BOSS stable, the Standard-Duty Straight-Blade plow now features a blade shock absorber and the BOSS SmartHitch 2 Attachment System on both its 7’6” Steel and Poly plows.

THE BOSS blade shock absorber helps stabilize the trip going forward as well as cushion the trip return.. BOSS’ Standard-Duty Straight-Blade Snowplows are specifically designed to make fast work of windrowing and back dragging and their moldboards allow for smooth tripping action while offering superior scraping ability.

When the snow is falling and time means money, THE BOSS SmartHitch 2 is the fastest, simplest, easiest-to-use attachment system on the market. Attaching THE BOSS SmartHitch 2 is as easy as setting the lockpin levers to the “on” position, connecting the two electrical plugs and raising the light tower with a touch of a button. In addition, every BOSS Snowplow comes with a two-year warranty covering both parts and labor.

Since 1985 THE BOSS Snowplow has made snowplowing efficient and easy with innovative products that set new industry standards for quality, reliability, craftsmanship and performance. All BOSS snowplows are designed, built and put to the ultimate performance test in Michigan’s rugged Upper Peninsula, where winters — and deep snow — are a way of life.

THE BOSS snow-removal products and accessories are manufactured in an approved ISO 9001:2000 registered facility and are available to professionals and homeowners through the company’s nationwide network of distributors. For more information on THE BOSS Snowplow and the full line of BOSS accessories, call 800-286-4155 or visit the company’s website at bossplow.com.
