

BUILT BOSS TOUGH. ENGINEERED FOR YOUR UTV.

INTRODUCING THE ALL-NEW UTV SNOWPLOWS FROM THE BOSS.

Specially engineered for your UTV yet built to the same professional-grade standards as full-size BOSS plows, our BOSS UTV plows are tough enough to handle any snow removal job. In fact, BOSS Snowplows are designed, built and tested in Iron Mountain, Michigan, where snow, ice and harsh winter conditions are a way of life.

PUSHING THE EDGE™

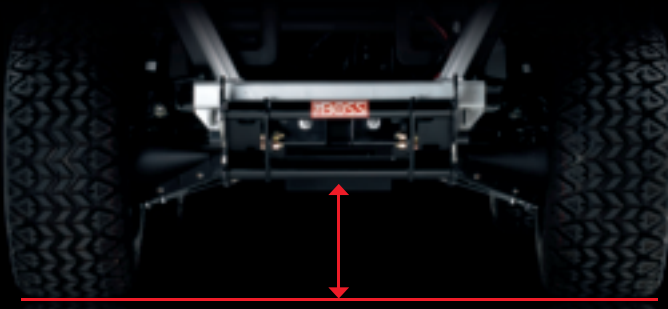

HIGH-PERFORMANCE, FULLY
HYDRAULIC POWER LIFT AND ANGLE,
IMPACT AND STORM PROTECTED

AVAILABLE WITH THE
EASIEST-TO-USE ATTACHMENT
SYSTEM, SMARTHITCH® 2

HEAVY-DUTY,
INDUSTRY-LEADING,
HIGH-QUALITY CONSTRUCTION

UNMATCHED GROUND CLEARANCE.

Not only did we make sure that the Sloped-Profile Undercarriage is rugged and tough, but we also made sure it never decreased your ground clearance. That means, when your BOSS UTV plow is not attached, your UTV remains the tough, off-road-capable vehicle you need.

HIGHEST BLADE LIFT.

Thanks to its fully protected, high-performance hydraulic system, THE BOSS UTV Plow provides the highest blade lift height available for unmatched snow stacking capability—making it easier to pile the snow higher as the winter wears on.

SMART TECHNOLOGY SYSTEM.

Attach and detach your plow in seconds with the optional SmartHitch 2, the fastest, simplest attachment system on the market.

Easy to use and designed for both right- or left-hand use, the SmartTouch® 2 control can be removed and used with several different mounting options.

Every BOSS plow is protected by the corrosion-resistant, powder-coat paint SmartShield® system, featuring our exclusive zinc primer.

TOUGHEST, MOST RELIABLE HYDRAULICS.

When it comes to power angling and lifting, typical winch or electric systems don't even come close to the speed, response and control of our ultra-tough hydraulic system. And unlike competitive systems,

our hydraulic pumps are fully enclosed to protect against moisture and freeze-up, they're higher off the ground and protected by a steel frame for unmatched durability in the field.

TWO-YEAR LIMITED WARRANTY

protects against material and manufacturer defects for up to two full years.
