PUSHING THE EDGE  

MSC12841-3
Safety

WARNING

Serious injury or death can result if you do not follow these instructions and procedures which are outlined further within your owner’s manual.

- NEVER exceed the vehicle’s Gross Vehicle Weight Rating or the Front or Rear Gross Axle Weight Ratings. Overloading could result in an accident or damage.
- Read this manual and all labels carefully. Follow the operating procedures described.
- Follow all Operator Safety instructions found in your UTV Owner’s Manual.
- Follow all age restrictions found in your UTV Owner’s Manual.
- When transporting, position plow so as not to block vision.
- NEVER change blade position when traveling.
- ALWAYS use LOW RANGE and never exceed 14 mph when plowing.
- ALWAYS use LOW RANGE and never exceed 24 mph while transporting plow.
- ALWAYS use LOW RANGE and never exceed 5 mph while operating plow.
- Always lower blade when vehicle is not in use.
- Make sure plow is properly attached before moving vehicle.
- The 6’0” Sport Duty UTV Straight Blade Plow is intended for personal, non-commercial use. Any use of the plow in a commercial setting will void the plow warranty.
- NEVER ride on Plow System.
- NEVER lift persons on Plow System.
- NEVER get body parts between Plow System and vehicle while servicing or operating.
- NEVER operate on steep inclines.
- Operators should always use vehicle seat belts and all other applicable personal protective equipment while operating plow.
- NEVER operate vehicle or plow unless Tire Pressure and Vehicle Ballast Requirements are satisfied.
- Always remove ignition key and unplug Plow System before servicing.
- Wear proper personal protection equipment when operating and servicing snowplow; including, but not limited to, clothing for cold weather and slippery surfaces.
- Some snowplow components are very heavy – use properly rigged 1/2-ton minimum lifting device to maneuver heavy snowplow components.
- Snowplow operating noise level below 70dB.
- Hydraulic component installation and maintenance must be performed by trained personnel.
- Never place body parts between snowplow and vehicle.
- When transporting be sure to properly secure your load. Proper load securing instructions are available at www.bossplow.com.
Safety

WARNING

POTENTIAL HAZARD
Operating Plow System without proper instruction

WHAT CAN HAPPEN
Loss of control, accident

HOW TO AVOID THE HAZARD
The risk of an accident is greatly increased if the operator does not know how to operate the Plow System properly in different situations.

All operators must read and understand the Owner’s manual and instruction labels before operating the system.

WARNING

POTENTIAL HAZARD
Operating the vehicle with the Plow System not properly attached. The pins are not fully engaged.

WHAT CAN HAPPEN
Loss of control, accident

HOW TO AVOID THE HAZARD
Never operate the vehicle when the Plow System is not properly attached.

WARNING

POTENTIAL HAZARD
Operating the vehicle with the Plow System in a position that blocks your vision.

WHAT CAN HAPPEN
Collision with obstacle or another vehicle

HOW TO AVOID THE HAZARD
Never operate the vehicle when the Plow System is in a position that blocks your vision.

A REVOLUTION AGAINST SNOW

Congratulations on purchasing the finest snowplow made. The BOSS sets the standard for quality, reliability, craftsmanship, and performance. Our products are designed, built, and proven in Michigan’s rugged Upper Peninsula, where winter is a way of life. And we back it all up with exceptional customer service and satisfaction. We’re not just setting the standard. We’re leading the way.

The BOSS SNOWPLOW has been carefully designed and built for years of carefree performance. With its simple attaching system, the BOSS can be attached or removed in seconds. For safety, the BOSS includes cross-over pressure relief to prevent damage by overstress. Where A-Frame and moldboard fatigue are a common problem on conventional plows, a BOSS PLOW will stand up to severe plowing conditions.

To keep your BOSS PLOW in top shape, take a few minutes to study this manual. It will show you how to use and service the BOSS, familiarize you with all of its parts, and give you helpful tips on plowing snow.

If you have further questions, your local BOSS DEALER is the person to talk to. They know your plow well and want your complete satisfaction.

IMPORTANT
Keep this section for your record.

**Tips on Plowing Snow**

- Know the area you are plowing, hidden obstructions such as curbs, sidewalks, pipes, etc. can cause damage to your plow or vehicle.
- Do not let the snow accumulate; always plow with the storm.
- Always wear your seatbelts when plowing snow.
- Occasionally, the plow blade may be in a position where it cuts off airflow to the radiator. While this is a rare occurrence, it can usually be corrected by raising or lowering the plow slightly.
- Always lower the blade when parking your vehicle. This reduces the load on your vehicle’s springs and guards against any potential mishap caused by a falling plow.
- Always remember to plow at a safe speed. The faster you plow the harder you will hit hidden obstructions.
- Do not get body parts between or under the plow and vehicle when servicing or operating the plow.
- When transporting, position plow so as not to block vision.
- Do not change blade positions while traveling.
- For more plowing tips please visit our website at www.bossplow.com.
**Maintenance**

Your BOSS PLOW is designed for reliable service with minimal maintenance. To ensure that it gives you the same high performance year after year, please use it properly and observe the following maintenance precautions:

- Inspect the following on a regular basis:
  - All fasteners, pins, retainers, nuts and bolts for tightness. *See Recommended Bolt Torque located in this manual.*
  - All hydraulic lines and connections for wear and leakage.
  - Hydraulic cylinders for leakage, rods for rust or pitting.
  - Cutting edge wear.
  - Plow shoe wear.
  - Hydraulic oil level (CAUTION: DO NOT OVERFILL). Fill hydraulic pump reservoir as shown on page 24 using Boss High Performance Hydraulic Fluid or equivalent.
  - Control Harness and Power/Ground Cable Connectors for corrosion. Apply dielectric grease at least once a month during the plow season.
  - Apply grease to coupler spring pins and kickstand spring pin.

**Putting the Plow into Storage**

1. Drive the snowplow to a storage site. Follow the normal procedure for dismounting from the plow.
2. Disconnect all electrical plugs and coat each connection with dielectric grease (lights, valve assembly, pump, pump solenoid, and battery). Install all dust caps and plugs provided.
3. Touch-up any rust spots or chipped paint.
4. Loosen the trip springs.
5. Grease the coupler spring pins and kickstand spring pin.
6. Power the lift tower forward until the lift cylinder is completely compressed. This will protect the lift cylinder from corrosion.
7. Grease the exposed chrome on the angling cylinders to protect from corrosion.

**Taking the Plow out of Storage**

1. Check all fasteners for tightness. *See Recommended Bolt Torque located in this manual.*
2. Check hydraulic hoses for cracks and leaks.
3. Check hydraulic oil level (CAUTION: DO NOT OVERFILL). Fill hydraulic pump reservoir as shown on page 24 using BOSS High Performance Hydraulic Fluid or equivalent.
4. Tighten the trip springs.
5. Coat each electrical connection with dielectric grease (lights, valve assembly, pump, pump solenoid and battery).
6. Grease the coupler spring pins and kickstand spring pin (Fig. 1).
Snowplow Assembly Procedure

Note: This manual is used for the assembly of the BOSS Sport Duty UTV Straight Blade Plow. Part numbers for the BOSS Sport Duty UTV Straight Blade plow are listed on the parts diagram in this manual.

1. Attach Push Frame Attachment Bar (3) to Plow Blade (4) using two HDW01706 5/8"-11 x 4" Hex Head Cap Screws (66) and two HDW01709 5/8"-11 Self-Locking Nuts (67).

2. Insert MSC01509 Trip Spring (39) through the holes provided on Push Frame Attachment Bar (3).

3. Attach HDW02004 Spade Bolt (48) around the loose end of Trip Spring (39).

4. Insert the threaded end of Spade Bolt (48) through the hole in the spring mounting brackets on the back of Blade Assembly (4). Secure each Spade Bolt (48) with one HDW01729 ½" Flat Washer (41) and one HDW01748 Self Locking Nut (44). Tighten Self-Locking Nuts (43) until the coils on Trip Springs (39) are approximately 1/32" apart.

5. Position the rod end of HYD07022 Lift Cylinder (12) between the cylinder mounts of Push Frame Assembly (2). Insert HDW05614 5/8" x 3 Clevis Pin (57) through the cylinder mounts and secure with HDW05544 #16 Hairpin Cotter (56).

6. Align the pivot holes of Coupler Assembly (1) with the pivot holes of Push Frame Assembly (2).

7. Insert 3/4" x 2" Pivot Pins (52A) through Coupler Assembly (1) and Push Frame Assembly (2). Place a 3/4" Flat Washer (52B) on 3/4" x 2" Pivot Pin (52A) then insert 3/16" x 2 ⅛" Cotter Pin (52C) through 3/4" x 2" Pivot Pin (52A). Spread the ends of 3/16" x 2 ⅛" Cotter Pin (52C).
8. Rotate Lift Cylinder (12) up to the cylinder mounts located on Coupler Tower Assembly (1). Insert 5/8" x 3 ½" Clevis Pin (57) through the cylinder mounts and secure with #16 Hair Pin Cotter (56).

9. Remove the plug from the top end of the Lift Cylinder (12).

10. Install Breather Vent (17) into top end of Lift Cylinder (12).

![Figure 5. Hydraulic Connections](image1.jpg)

11. Install HYD01620 90° Swivel (16) fitting into the lower port of Lift Cylinder (12).

12. Install HYD01695 ¼" x 15 ½" Hydraulic Hose (13) between the middle fitting on the hydraulic shelf and the 90° Swivel (16) installed in the previous step. Tighten both ends of the hose securely.

13. Install HYD01620 90° Fitting (16) into left Angle Cylinder (11). 90° Fitting (16) should be installed at a 45° angle forward.

14. Install HYD12825 Hydraulic Hose (15) between the left fitting on the hydraulic shelf and 90° Fitting (16) installed in the previous step. Tighten both ends of the hose securely.

15. Repeat steps 13-14 for the Right Angle Cylinder Hose.

![Figure 6. Assembly of Blade Guides](image2.jpg)

16. Attach Blade Guides (40) to Blade Assembly (4) using Hex Head Cap Screws (46), Self Locking Nuts (45), and Self-Tapping Hex Head Cap Screws (47).
Electrical System Installation Procedure

NOTICE:
Before splicing into any electrical circuit, identify the circuit with a test lamp. Failure to test circuits may result in vehicle damage.
Be sure the wire loom does not interfere with the operation of the vehicle’s pedals.

1. Pull the 9 Pin Molex connector (G) from under the hood, into the cab.

2. Secure the 9 Pin Molex Connector (G) to the left of the steering wheel using two self tapping bolts and provided dash bracket. (Some vehicle use existing hardware. See figure 8)

3. Plug the controller into the 9 Pin Molex Connector (G).

4. Mount the plow control in a location that is comfortable for the operator to reach, and where the operator will not contact the control in the event of a crash. (See “Straight Blade Controller Mounting Instructions” located in this manual.)

5. Connect the BLACK/RED wire (I) to a “keyed” 12V+ ignition source on the vehicle. An example is pictured in Figure 9.

6. Connect the WHITE/BLACK wire (J) of Wiring Harness (21) to the small terminal on Pump Solenoid (23).

7. Connect the BROWN wire (K) of Wiring Harness (21) to the other small terminal on Pump Solenoid (23).

Note: Location of the wires on the small terminals does not matter.

8. Attach Power Unit Solenoid (23) securely inside the under hood compartment. The Power Unit Solenoid should be mounted in the upright position as illustrated above. (See Figure 9)

Note: The solenoid must be installed so that the solenoid posts do not contact the body or any other conductive material on the vehicle.

9. Attach the eyelet end of RED Power/Ground Cable (20) to the large post of Pump Solenoid (23). (See Figure 9)

10. Connect Battery Cable (24) to the other large post of Pump Solenoid (23). (See Figure 9)

Note: Location of the wires on the large terminals does not matter.

Note: Kubota, John Deere, and Kawasaki vehicles will require Battery Cable Extension Kit. (MSC13171)
**NOTICE:**

All plow wiring should be secured under the hood in a position that provides sufficient room so that hot or moving parts will not be contacted. Vehicle damage could occur if wires are not properly secured.

---

**11.** Attach the eyelet end (N) of **BLACK** Power/Ground Cable (20) to the negative battery terminal.

**12.** Connect the **BROWN** wire (Q) to the negative battery terminal.

**13.** Connect the unattached end (P) of Battery Cable (24) to the positive battery terminal.

**14.** Connect the **RED** Fused wire (O) to the positive battery terminal.

---

**15.** Mount the Black 13 Pin Control Harness Connector to the top tube of the bumper on the Driver's Side using self-tapping bolts and **MSC12815** Control Harness Mounting Bracket. (See Figures 12 & 13 for an example) Drilling is required.

---

**16.** Mount the **BLACK** and **RED** 2 Pin Power Ground Connector to the **MSC12815** Bracket using **MSC03491** Power Ground Mounting Bracket.

**17.** Attach the Relay Pack securely under the hood using one **HDW01766** Sheet Metal Screws. The relays should be positioned upright as illustrated in Figure 14.

---

**18.** Secure all plow harness wiring using provided tie straps.

**19.** Attach the snowplow to the vehicle. Use the “Snowplow Mounting Procedure” that is located in this manual to properly attach the snowplow to the vehicle.

Hydraulic Power Unit Fill Procedure

Step 1 of the following fill procedure is intended for a new plow with an empty hydraulic system.

Initial Plow Position: Start with the plow un-attached from the vehicle and the lift cylinder completely collapsed. The light tower will be tilted forwarded.

1. Remove HYD04810 Fill Cap (9C) from HYD04809 Street Elbow (9D) and fill with Boss High Performance Hydraulic Fluid. Continue to fill Street Elbow (9D) until no more fluid will be accepted. (Approx. 2 quarts.)

2. Attach the plow to the vehicle.

Note: If plow is equipped with SmartHitch2™ you must hydraulically power the light tower up. Do not manually push the tower up. Failure to hydraulically power the light tower up will create an air pocket in the hydraulic system. Oil will spill out of your internal filler cap.

3. Raise the plow.

4. With the plow in the raised position, cycle through both angle functions several times.

5. Lower the plow to the ground.

6. With the blade in the straight position and the plow lowered to the ground, check the fluid level. Fluid should be visible in the external fill port. If fluid is not visible, fill until visible. Your reservoir should now be properly filled.

Figure 19. External Fill – Backside View G10625

Figure 20. Oil Full Level

Plow Position to Check Oil: The plow should be attached to the vehicle, sitting flat on the ground, with the blade in the straight position.

Operating Instructions

1. Slide the ON/OFF switch to the right to turn the Handheld Control on. Green LED indicators will light up on the control.

2. To RAISE or LOWER the blade of the plow, press the center button to the desired position.

3. Holding the LOWER button for 2 seconds will activate the Automatic "FLOAT" feature. (The center LED indicator will turn RED.)

   **Note:** The FLOAT feature allows the plow blade to mirror the contour of the ground.

   **Note:** Press the raise button to turn the FLOAT function off.

4. Pressing the Angle Left button will swing the plow to the left, pushing snow to the left.

5. Pressing the Angle Right button will swing the plow to the right, pushing snow to the right.

6. The control should be turned off when not in use. It can then be unplugged and stored.

Mounting Instructions

1. Remove the Swivel Mount and Tab from the MSC05058 Swivel Mount Kit.

2. Use the enclosed alcohol wipe to clean a spot on the vehicle interior where you want to place the SmartTouch™ Control. Wipe dry immediately with a cloth or paper towel.

3. Do not apply when the surface temperatures are lower than +60°F (Working temperature range of the adhesive is -40°F to +200°F).

4. Peel off the paper backing on one side of the adhesive and apply to Swivel Mount. Apply maximum pressure to all areas.

5. Apply the Swivel Mount onto the spot of the interior that was just cleaned. (MAKE SURE IT IS IN THE CORRECT PLACE) Once it is placed it cannot be removed without destroying the adhesive.

6. Clean the back of the SmartTouch™ Control with the alcohol wipe.

7. Peel off adhesive backing of tape, apply to Tab, and press firmly.

8. Remove remaining backing and apply the Tab to the back of the SmartTouch™ Control. Apply pressure for 30 seconds.

   **NOTICE**

   After attaching the Swivel Mount, let it sit unused for 72 hours before attaching the SmartTouch™ Control to allow the adhesive to bond to the surface and insure secure mounting.

9. Place SmartTouch™ Control on the Swivel Mount.
Glossary of Problems:

1. Pump motor does not run.
2. Pump continues to run with switch in neutral.
3. Plow will not lower.
4. Plow will not raise or raises slowly, motor runs.
5. Blade Angles While Plowing Snow
6. Blade will not angle, but motor runs.
7. Blade angles too easily while plowing.
8. Oil leaks from cylinders.
9. Battery goes dead with all switches in neutral.
10. Plow does not clean-up snow from low areas.
11. Oil runs out of fill cap of hydraulic pump.
12. Pump chatters when raising the plow or angling blade.
13. SmartHitch2™ will not attach plow.

ALL TORQUE VALUES ARE IN FOOT-POUNDS (FT.-LB.)

Figure 25. Recommended Bolt Torque

NOTE: The torque values listed above are based on dry, coated bolts, variables such as oil, or other lubrications may appreciably alter these values and must be taken into consideration.

NOTICE: IT IS IMPORTANT THAT ALL FASTENERS BE PROPERLY TORQUED TO ASSURE A SAFE OPERATING PLOW. RE-TIGHTEN ALL FASTENERS AFTER 2 HOURS OF PLOWING.
BOSS SNOWPLOW
COMMERCIAL WARRANTY

What this warranty covers:
This warranty covers defects in material and workmanship except as set forth below.

Who is covered:
The original purchaser from an authorized dealer.

For how long:
Parts: 2 years from the date of purchase.
Labor: 2 years from the date of purchase.

What BOSS PRODUCTS will do:
BOSS PRODUCTS will, at its sole option, repair or replace defective parts at no charge.

What you must do to for warranty service:
To obtain warranty service, purchaser must return the defective snowplow to any authorized BOSS PRODUCTS dealer (preferably the one from whom the snowplow was purchased) within the warranty period. Purchaser must be able to verify the original purchase date. All transportation costs to and from the dealer will be the responsibility of the purchaser. To locate the authorized BOSS dealer nearest to you, call toll free: (800) 286-4155.

What is not covered:
This warranty does not cover:
1. Expendable parts such as hoses, plow shoes, cutting edges, pins, nuts, bolts, blade guides, etc.
2. Snowplows or parts repaired or altered by anyone other than an authorized BOSS PRODUCTS dealer.
3. Snowplows or parts which have been subject to misuse, negligence, accident, improper installation, maintenance, care or storage.
4. Snowplows mounted on vehicles other than those listed in the BOSS SNOWPLOW APPLICATION CHART AND SELECTION GUIDE.
5. BOSS PRODUCTS does not assume liability for damage to your motor vehicle resulting from the attachment or use of a BOSS PRODUCTS snowplow. Vehicle risk is the sole responsibility of the purchaser.

Limits of BOSS Products Liability are:
BOSS PRODUCT’S LIABILITY IS EXPRESSLY LIMITED TO REPAIR OR REPLACEMENT OF DEFECTIVE PARTS. BOSS PRODUCTS SHALL NOT BE LIABLE FOR CONSEQUENTIAL, INCIDENTAL OR CONTINGENT DAMAGES WHATSOEVER, EVEN IF DAMAGES ARE CAUSED BY THE NEGLIGENCE OR FAULT OF BOSS PRODUCTS.

THE FOREGOING WARRANTIES ARE EXCLUSIVE AND IN LIEU OF ALL OTHER EXPRESS AND IMPLIED WARRANTIES INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

This warranty does not apply if you purchased your snowplow for personal, family, or household use. In this case, refer to the BOSS Snowplow Limited Consumer Warranty.

(2010-2011)
BOSS SNOWPLOW LIMITED
CONSUMER WARRANTY

What the warranty covers:
BOSS PRODUCTS warrants to the original retail purchaser of a BOSS snowplow who purchases it for personal, family or household use, that the snowplow will be free from defects in material and workmanship except as set forth below.

Warranty period:
Parts: 2 years from the date of purchase.
Labor: 2 years from the date of purchase.

What BOSS PRODUCTS will do:
If, within the warranty period, the snowplow is found to be defective, BOSS PRODUCTS will repair or replace, at its sole option, the defective parts at no charge to the original purchaser.

What you must do for warranty service:
To obtain service under this warranty, purchaser must return the defective snowplow to an authorized BOSS PRODUCTS dealer (preferably the one from whom the snowplow was purchased). The purchaser must establish the warranty period by verifying the original purchased date. All transportation costs to and from the dealer will be the responsibility of the purchaser. To locate the authorized BOSS dealer nearest to you, call toll free: (800) 286-4155.

What is not covered:
This limited warranty does not cover the following:
1. Expendable parts such as hoses, plow shoes, cutting edges, pins, nuts, bolts, blade guides, etc.
2. Snowplows or parts repaired or altered by anyone other than an authorized BOSS PRODUCTS dealer.
3. Snowplows or parts which have been subject to misuse or service, negligence, accident, improper installation, maintenance, care or storage.
4. Snowplows mounted on vehicles other than those listed in the BOSS SNOWPLOW APPLICATION CHART AND SELECTION GUIDE.
5. BOSS PRODUCTS does not assume any liability for motor vehicle damage resulting from the attachment or use of a BOSS PRODUCTS snowplow. Vehicle risk is the sole responsibility of the purchaser.

Warranty limitations:
THIS WARRANTY IS OFFERED IN LIEU OF ANY OTHER EXPRESS WARRANTY.

THE DURATION OF ALL IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE DURATION OF THIS WARRANTY.

BOSS PRODUCTS LIABILITY IS EXPRESSLY LIMITED TO THE REPAIR OF THE SNOWPLOW, INCLUDING LABOR AND REPLACEMENT OF DEFECTIVE PARTS. BOSS PRODUCTS SHALL NOT BE LIABLE FOR ANY CONSEQUENTIAL, INCIDENTAL OR CONTINGENT DAMAGES WHATSOEVER, EVEN IF DAMAGES ARE CAUSED BY BOSS PRODUCTS NEGLIGENCE OR FAULT.

State laws:
Some states do not allow exclusion of incidental or consequential damages or the limitations on how long an implied warranty lasts, so these limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may also have the other rights which vary from state to state.

This warranty does not apply if you purchased your snowplow for other than personal, family, or household use. If so, refer to the BOSS Snowplow Commercial Warranty.
